

RACING AND SPORTS

RaceStats is a report for each meeting which provides a summary of each runner based on Neurons and other statistics.

Each race of the selected meeting can be looked at using a number of ratings displayed on the RaceStats sheet.

Horses in the race field receive various ratings figures based on a number of variables including their current form, jockey and trainer, plus a runners ability over the event distance, track, with a particular weight and in rain affected going.

Combined with a number of other ratings, these figures result in two Neuron ratings for each horse in the race, one for dry conditions another for wet.

At the bottom of every table a RaceStats sheet contains top ranked runners from nine ratings groups.

RACESTATS EXPLANATIONS

RaceStats Panel Information

Statistics Section	
WT	Weight to be carried in the race
BP	Barrier position
W%	Overall career winning percentage
P%	Overall career place percentage
S	Overall career starts
SPS	Average prizemoney per start
PM	Performance Margin Average margin a horse is beaten each race.
YPM	Year Performance Margin Average margin a horse is beaten by at each start over the past 12 months
DLR	Days since last run
LS	Losing sequence
ST	Overall strike rate rating for jockey and trainer respectively
LT	Course strike rate for jockey and trainer respectively
Crs	Winning percentage at the track The amount of starts the runner has had at the course sits next to the main figure in smaller text.
CPM	Course Performance Margin Average margin a horse is beaten by each time they have run at the track.
DIS	Winning percentage over distance The amount of starts the runner has had at the distance sits next to the main figure in smaller text.
DPM	Distance Performance Margin The average margin a horse is beaten by each time they have run of the distance.
SI	Winning percentage over Slow going The amount of starts the runner has had in Slow going sits next to the main figure in smaller text.
SPM	Slow going Performance Margin The average margin a horse is beaten by at each start on Slow going.
Hvy	Winning percentage over Heavy going The amount of starts the runner has had in Heavy going sits next to the main figure in smaller text.
HPM	Heavy going Performance Margin The average margin a horse is beaten by at each start on Heavy going.
Neurals Section	

CP	Career Form Rating Based on the horses overall career record
CF	Current Form Rating Based on a horses latest form
Tim	
JA	Jockey Rating
TA	Trainer Rating
JT	Jockey/Trainer combination rating Based on results when jockey and trainer combine for a ride
BP	Barrier Position Rating
WT	Wet Track Rating Based on a horses past performances on Slow and Heavy going
Crs	Course Rating Rating derived from a horses record at the track.
Dis	Distance Rating Rating derived from a horses record at the distance.
\$	Prizemoney Rating Rating calculated on prizemoney earnings.
DLR	Days Since Last Run Rating Rating based on the days since a horses last run.
NN	Normal Conditions Neural Neural used for when racing on Good and Dead surfaces
WN	Wet Conditions Neural Neural used for when racing on Slow and Heavy surfaces.
